

PEPFAR Reauthorization: Side-by-Side of Existing and Proposed Legislation

Kellie Moss and Jen Kates

Overview

The President's Emergency Plan for AIDS Relief (PEPFAR) is the U.S. government's global effort to combat HIV and the largest global health program devoted to a single disease (for more information, see the KFF fact sheet on [PEPFAR](#)). It was first proposed by President George W. Bush in 2003. Three major pieces of authorizing legislation govern PEPFAR's HIV response, as well as U.S. participation in the Global Fund to Fight AIDS, Tuberculosis and Malaria (Global Fund) and bilateral assistance for tuberculosis (TB) and malaria programs: The Leadership Act, The Lantos-Hyde Act, and The PEPFAR Stewardship Act (see Table 1). These legislative vehicles have permanently authorized much of the program within U.S. law but have also created some time-bound provisions. PEPFAR's current authorizing legislation goes through Fiscal Year (FY) 2018, which ended on September 30, 2018, and most of these time-bound provisions have expired. On August 3, 2018, the House introduced a bill (H.R. 6651) to reauthorize PEPFAR through FY 2023 and FY 2024, depending on the provision. The Senate introduced a similar bill (S. 3476) on September 18, 2018. The House passed H.R. 6651 on November 13, 2018, and the Senate passed it on November 28, 2018. The bill is now headed to the White House for the President's consideration and signature.

Table 1: PEPFAR Legislation

Full Title	Common Title	Public Law #	Years
<i>United States Leadership Against HIV/AIDS, Tuberculosis, and Malaria Act of 2003</i>	"The Leadership Act"	P.L. 108-25	FY 2004 - FY 2008
<i>Tom Lantos and Henry J. Hyde United States Global Leadership Against HIV/AIDS, Tuberculosis, and Malaria Reauthorization Act of 2008</i>	"The Lantos-Hyde Act"	P.L. 110-293	FY 2009 - FY 2013
<i>PEPFAR Stewardship and Oversight Act of 2013</i>	"The PEPFAR Stewardship Act"	P.L. 113-56	FY 2014 - FY 2018

This brief identifies the PEPFAR authorities that expired at the end of FY 2018 and notes how they are addressed by the proposed reauthorization bills (see Table 2). It also provides a detailed comparison of PEPFAR's authorizing legislation over time (see Table 3). It will be updated as needed.

Legislative Changes to PEPFAR Over Time

After first setting the broad parameters for PEPFAR and creating its main structures in 2003, PEPFAR's subsequent authorizing legislation has made several key changes to the program, as the HIV response has evolved and as PEPFAR has moved from an emergency response to one supporting longer-term

sustainability and epidemic control. These include changes to funding authorization levels and spending directives, as well as requirements for reporting and oversight. Among the major changes over time are:

- *Funding authorization levels:* The Leadership Act authorized \$15 billion during PEPFAR's first five-year period (FY 2004 – FY 2008), which marked a significant increase in funding for HIV by the U.S. government. The Lantos-Hyde Act authorized even more, with \$48 billion over the next five-year period (FY 2009 – FY 2013). The Stewardship Act did not specify authorization of funding for the most recent five-year period (FY 2014 – FY 2018).
- *Spending directives:* Congress has provided several spending directives to PEPFAR through its authorizing legislation, although these have generally been relaxed over time. For example, in the Leadership Act, Congress required that at least 33% of prevention funds be spent on abstinence-until-marriage programs during the FY 2004 – FY 2009 period. This was relaxed in the Lantos-Hyde Act, which removed the 33% directive and replaced it with a requirement of “balanced funding” for prevention, to be accompanied by a report to Congress if less than half of prevention funds were spent on abstinence, delay of sexual debut, monogamy, fidelity, and partner reduction activities in any host country with a generalized epidemic.
- *Reporting, monitoring, and transparency:* Each of the authorizing bills has included reporting requirements to provide Congress and others with data and information about the program and to support oversight and evaluation. For example, the Leadership Act and the Lantos-Hyde Act required the Institute of Medicine to conduct evaluations of PEPFAR; however, this was not included in the PEPFAR Stewardship Act. The Lantos-Hyde Act and the PEPFAR Stewardship Act require the Inspectors General of several U.S. agencies (the Department of State, the Department of Health and Human Services, and the U.S. Agency for International Development) to jointly develop coordinated annual plans for overseeing U.S. government global HIV, TB, and malaria programs.

It is important to note that Congress has also made changes to PEPFAR through other legislative vehicles. For example, Congress has used appropriations legislation in certain years to change the amount of withholding required from the annual U.S. contribution to the Global Fund, pending certification of certain benchmarks by the Secretary of State. Still, by the time of the Stewardship Act, a decade after PEPFAR's creation, most changes were relatively minor, focused on adding new or refining existing reporting requirements.

Permanent and Expiring Authorities

PEPFAR operates largely under permanent authorities of U.S. law that allow for ongoing funding and the continuation of the major structures of the program, such as the Office of the Global AIDS Coordinator at the Department of State as well as the position of Global AIDS Coordinator, U.S. participation in the Global Fund, and annual reporting on PEPFAR efforts. Absent a reauthorization, the PEPFAR program would continue, provided funds are appropriated. Still, seven of PEPFAR's congressionally-mandated requirements expired at the end of FY 2018, while one (a requirement for an annual treatment study) will expire at the end of FY 2019. Of these, two relate to how HIV funding is allocated, four specify requirements related to the U.S. contribution to the Global Fund, and two address reporting or oversight. Both H.R. 6651 and S. 3476 would extend these expiring authorities, and after changes to the House bill

during committee markup, the bills are virtually identical. Both chambers of Congress have now passed H.R. 6651, and the bill moves to the President for consideration and signature. If, however, a reauthorization bill is not enacted, these provisions could be extended through appropriations legislation or via some other legislative vehicle.

Table 2: PEPFAR Legislation - Expiring Provisions and Proposed Legislation			
Topic of Provision	Description	H.R. 6651 (8-3-18 introduced; passed House 11-13-18 and Senate 11-28-18)	S. 3476 (9-18-18 introduced)
HIV Bilateral Funding Allocation: Treatment, Care, Nutrition and Food Support	Requires that more than half of funds appropriated or otherwise made available for bilateral HIV be expended for treatment, care, and nutrition and food support for people living with HIV (through FY 2018)	Extended through FY 2023	Extended through FY 2023
HIV Bilateral Funding Allocation: Orphans and Vulnerable Children (OVC)	Requires that not less than 10% of funds appropriated or otherwise made available for bilateral HIV be expended for programs targeting orphans and other children affected by, of vulnerable to, HIV (through FY 2018)	Bill as introduced did not include an extension; added extension through FY 2023 during committee markup on 9-27-18	Extended through FY 2023
Global Fund Contribution: 1/3 Cap	Limits U.S. contributions to the Global Fund to not exceed 33% of all funds donated to the Global Fund during a specified period ("1/3 cap") (through FY 2018)	Extended through FY 2023, calculated from FY 2004	Extended through FY 2023, calculated from FY 2004
Global Fund Contribution: Use of Funds Withheld Due to 1/3 Cap	Authorizes that any of the U.S. contribution to the Global Fund withheld due to the 1/3 cap may be used for bilateral HIV, TB, and malaria programs (through FY 2018)	Extended through FY 2023	Extended through FY 2023
Global Fund Contribution: Withholding Obligation of 20% Pending Certification	Requires withholding 20% of annual U.S. contribution to the Global Fund pending certification of certain accountability and transparency benchmarks by the Secretary of State* (through FY 2018)	Extended through FY 2023	Extended through FY 2023
Global Fund Contribution: Withholding Portion if Funds Expended to Certain Governments	Requires withholding a portion of the U.S. contribution to the Global Fund, the next fiscal year, equal to the amount expended by the Global Fund to country governments determined by the Secretary of State to have "repeatedly provided support for acts of international terrorism" (through FY 2018)	Extended through FY 2023**	Extended through FY 2023**
Annual Treatment Providers Study	Directs the Global AIDS Coordinator to annually complete a study of treatment providers for HIV programs, including spending by the Global Fund and partner countries (through FY 2019)	Extended through FY 2024	Extended through FY 2024
Oversight Plans of Inspectors General	Directs various agencies' inspectors general to jointly develop coordinated annual plans for overseeing HIV, malaria, and TB programs (through FY 2018)	Extended through FY 2023	Extended through FY 2023

NOTES: * In certain years, Congress directed the withholding to be 10%, rather than 20%. **Would also amend the use of funds withheld due to this provision to them to be used for bilateral HIV, TB, and malaria programs (current legislation allows them to be used for bilateral HIV only). Also would also apply to any funds withheld due if certain expenses exceeding 10%.

Common Title	THE LEADERSHIP ACT	THE LANTOS-HYDE ACT	THE PEPFAR STEWARDSHIP ACT
		Requires U.S. Comptroller General to submit a one-time report on U.S. global HIV/AIDS programs no later than 3 years after enactment of Lantos-Hyde Act	
<p>NOTES: Provisions expiring at the end of FY 2018 are in red. Existing law remains in force unless it was limited to a specific period (expiring at a particular point, such as funding that was authorized through the end of a certain fiscal year) or amended.</p> <p>a: Also authorizes an additional \$2 billion over five years for Emergency Fund for Indian Health and Safety and requires establishment of an emergency plan for Indian safety and health.</p> <p>b: Defines partner country as a country that receives a minimum of \$5 million in HIV/AIDS assistance from the U.S. Government in the previous fiscal year, for the purposes of the annual report and the Treatment Provider Study.</p> <p>c: Governed by Immigration & Nationality Act, which prohibits HIV-positive individuals from visiting or immigrating to the United States (except if a waiver is granted). HIV is only health condition specifically named as inadmissible in the law; for all others, the Secretary of Health and Human Services is given the authority to decide what conditions pose public health threats.</p> <p>d: Returns decision about whether HIV should be considered a threat to public health to the Secretary of Health & Human Services, as is the case for all other health conditions.</p> <p>e: This amendment to the Leadership Act was made in the Consolidated Appropriations Act of 2004 (P.L. 108-199).</p> <p>f: Specifically, amounts withheld from the U.S. contribution 1) equaling the amount of funding, if any, expended by the Global Fund in the prior year to any governments that have "repeatedly provided support for acts of international terrorism" and 2) equaling the average annual amount of funding, if any, spent on certain administrative expenses in excess of 10% of the total expenditures of the Global Fund for any 2-year period.</p> <p>g: In certain years, Congress directed 10% withholding, rather than 20%.</p> <p>h: For U.S. contributions from FY 2015 through FY 2018, Congress directed that the basis for calculating the limitation of the overall U.S. contribution to not exceed 33% of total Global Fund contributions would be U.S. contributions relative to all contributions to the Global Fund from FY 2004 rather than FY 2009, as was directed in the 2013 PEPFAR Stewardship Act.</p> <p>SOURCES: KFF analysis of: U.S. Congress, <i>United States Leadership Against HIV/AIDS, Tuberculosis, and Malaria Act of 2003</i> (P.L. 108-25), May 27, 2003; <i>Tom Lantos and Henry J.
