Topline

## Kaiser Health Tracking Poll: November 2016

## METHODOLOGY

This Kaiser Health Tracking Poll was designed and analyzed by public opinion researchers at the Kaiser Family Foundation (KFF). The survey was conducted November 15-21, 2016, among a nationally representative random digit dial telephone sample of 1,202 adults ages 18 and older, living in the United States, including Alaska and Hawaii (note: persons without a telephone could not be included in the random selection process). Computer-assisted telephone interviews conducted by landline (422) and cell phone (780, including 467 who had no landline telephone) were carried out in English and Spanish by Princeton Data Source under the direction of Princeton Survey Research Associates International (PSRAI). Both the random digit dial landline and cell phone samples were provided by Survey Sampling International, LLC. For the landline sample, respondents were selected by asking for the youngest adult male or female currently at home based on a random rotation. If no one of that gender was available, interviewers asked to speak with the youngest adult of the opposite gender. For the cell phone sample, interviews were conducted with the adult who answered the phone. KFF paid for all costs associated with the survey.

The combined landline and cell phone sample was weighted to balance the sample demographics to match estimates for the national population using data from the Census Bureau's 2014 American Community Survey (ACS) on sex, age, education, race, Hispanic origin, and region along with data from the 2010 Census on population density. The sample was also weighted to match current patterns of telephone use using data from the July-December 2015 National Health Interview Survey. The weight takes into account the fact that respondents with both a landline and cell phone have a higher probability of selection in the combined sample and also adjusts for the household size for the landline sample. All statistical tests of significance account for the effect of weighting.

The margin of sampling error including the design effect for the full sample is plus or minus 3 percentage points. Numbers of respondents and margins of sampling error for key subgroups are shown in the table below. For results based on other subgroups, the margin of sampling error may be higher. Sample sizes and margins of sampling error for other subgroups are available by request. Note that sampling error is only one of many potential sources of error in this or any other public opinion poll. Kaiser Family Foundation public opinion and survey research is a charter member of the Transparency Initiative of the American Association for Public Opinion Research.

| Group | N (unweighted) | M.O.S.E. |
| :--- | :---: | :---: |
| Total | 1202 | $\pm 3$ percentage points |
| Half Sample A | 599 | $\pm 5$ percentage points |
| Half Sample B | 603 | $\pm 5$ percentage points |
| Voters in the 2016 Election |  |  |
| Total Voters | 948 | $\pm 4$ percentage points |
| Trump Voters | 364 | $\pm 6$ percentage points |
| Clinton Voters | 408 | $\pm 6$ percentage points |
| Party Identification |  |  |
| Democrats | 403 | $\pm 6$ percentage points |
| Republicans | 316 | $\pm 6$ percentage points |
| Independents | 346 | $\pm 6$ percentage points |

All trends shown in this document come from Kaiser Health Tracking Polls except:

D4. Are you, yourself, now covered by any form of health insurance or health plan or do you not have health insurance at this time? (READ IFNECESSARY: A health plan would include any private insurance plan through your employer or a plan that you purchased yourself, as well
D4a. Which of the following is your MAIN source of health insurance coverage? Is it a plan through your employer, a plan through yourspouse's employer, a plan you purchased yourself either from an insurance company or a state or federal marketplace, are you coveredby Medicare or (Medicaid/[INSERT STATE-SPECIFIC MEDICAID NAME]), or do you get your health insurance from somewhere else?

[^6]26. In general, the term 'pre-existing condition' is used by insurance companies to describe an illness or medical condition that a person had before they began looking for insurance. For example, if you were looking to buy health insurance but had a history of asthma, diabetes or high blood pressure, those would be considered pre-existing conditions, along with illnesses such as cancer. Given that definition, would you say that you or someone else in your household would be considered to have a 'pre-existing condition' of some sort, or not?

Yes, someone in household has pre-existing condition 53
No, no one in household has pre-existing condition 46
Don't know 1
Refused

[^0]:    1 May 2010 through December 2011 trend wording was "As you may know, a health reform bill was signed into law early last year..."
    2 April 2010 trend wording was "[President Obama did sign a health reform bill into law last month...] Given what you know about the new health reform law, do you have a generally (favorable) or generally (unfavorable) opinion of it? (Is that a very favorable/unfavorable or somewhat favorable/unfavorable opinion?)"

[^1]:    3 Don't know and Refused were recorded separately for this question and some other questions throughout the survey. Prior to October 2016, Don't know/Refused was combined into one category. Trend results prior to 2016 for "Refused" are shown in the "Don't know" category.
    4 October 2016 question wording was "What would you like to see the next president and Congress do when it comes to the health care law?"
    5 November 2014 to April 2016 question wording was "What would you like to see Congress do when it comes to the health care law?"

[^2]:    6 Trend wording was "Do you think Congress should (repeal the law and replace it with a Republican-sponsored alternative) or should they (repeal the law and not replace it)".

[^3]:    7 Trend wording was "Next, I'm going to read you several elements of the health reform law..."
    8 November 2011 to March 2013 wording for this item was "The law will require nearly all Americans to have health insurance by 2014 or else pay a fine".
    9 March to July 2012 trend wording for this item was "The law will expand the existing Medicaid program to cover more low-income, uninsured adults". 2011 wording was "The law will expand the existing Medicaid program to cover low-income, uninsured adults regardless of whether they have children".

[^4]:    ${ }^{10}$ November 2011 to March 2013 trend wording for this item was "The law gradually closes the Medicare prescription drug "doughnut hole" or coverage gap so seniors will no longer be required to pay the full cost of their medications when they reach the gap".
    ${ }^{11}$ March 2012 and August 2012 trend wording for this item was "The law eliminates out-of-pocket costs for many preventive services, such as blood pressure or cholesterol screenings".
    ${ }^{12}$ November 2011 trend wording for this item was "The law eliminates co-pays and deductibles that people previously had to pay for many preventive services"
    ${ }^{13}$ March 2010 to March 2013 trend wording for this item was "The law allows children to stay on their parents' insurance plans until age 26 ".
    ${ }^{14}$ November 2011 trend wording for this item was "Increasing the Medicare payroll tax for high income Americans as a way to help pay for health reform".
    ${ }^{15}$ December 2014 trend wording for this item was "The law requires employers with 100 or more employees to pay a fine if they don't offer health insurance starting in January 2015".
    ${ }^{16}$ November 2011 to March 2013 trend wording for this item was "The law will require employers with 50 or more employees to pay a fine if they don't offer health insurance".

[^5]:    17 June 2010 wording for this item was "Creating health insurance exchanges or marketplaces where small businesses and people who don't get coverage through their employers can shop for insurance and compare prices and benefits".

[^6]:    ${ }^{18}$ Refusals were coded by observation.
