Topline

## Kaiser Health Tracking Poll: October 2016

## METHODOLOGY

This Kaiser Health Tracking Poll was designed and analyzed by public opinion researchers at the Kaiser Family Foundation (KFF). The survey was conducted October 12-18, 2016, among a nationally representative random digit dial telephone sample of 1,205 adults ages 18 and older, living in the United States, including Alaska and Hawaii (note: persons without a telephone could not be included in the random selection process). Computer-assisted telephone interviews conducted by landline (424) and cell phone (781, including 476 who had no landline telephone) were carried out in English and Spanish by Princeton Data Source under the direction of Princeton Survey Research Associates International (PSRAI). Both the random digit dial landline and cell phone samples were provided by Survey Sampling International, LLC. For the landline sample, respondents were selected by asking for the youngest adult male or female currently at home based on a random rotation. If no one of that gender was available, interviewers asked to speak with the youngest adult of the opposite gender. For the cell phone sample, interviews were conducted with the adult who answered the phone. KFF paid for all costs associated with the survey.

The combined landline and cell phone sample was weighted to balance the sample demographics to match estimates for the national population using data from the Census Bureau's 2014 American Community Survey (ACS) on sex, age, education, race, Hispanic origin, and region along with data from the 2010 Census on population density. The sample was also weighted to match current patterns of telephone use using data from the July-December 2015 National Health Interview Survey. The weight takes into account the fact that respondents with both a landline and cell phone have a higher probability of selection in the combined sample and also adjusts for the household size for the landline sample. All statistical tests of significance account for the effect of weighting.

The margin of sampling error including the design effect for the full sample is plus or minus 3 percentage points. Numbers of respondents and margins of sampling error for key subgroups are shown in the table below. For results based on other subgroups, the margin of sampling error may be higher. Sample sizes and margins of sampling error for other subgroups are available by request. Note that sampling error is only one of many potential sources of error in this or any other public opinion poll. Kaiser Family Foundation public opinion and survey research is a charter member of the Transparency Initiative of the American Association for Public Opinion Research.

| Group | $N$ (unweighted) | M.O.S.E. |
| :--- | :---: | :---: |
| Total | 1205 | $\pm 3$ percentage points |
| Half Sample A | 583 | $\pm 5$ percentage points |
| Half Sample B | 622 | $\pm 5$ percentage points |
| Registered Voters |  |  |
| Total RV | 1029 | $\pm 4$ percentage points |
| Democratic RV | 368 | $\pm 6$ percentage points |
| Republican RV | 259 | $\pm 7$ percentage points |
| Independent RV | 331 | $\pm 6$ percentage points |
| Trump Supporters (RV) | 394 | $\pm 6$ percentage points |
| Clinton Supporters (RV) | 525 | $\pm 5$ percentage points |
| Party Identification |  |  |
| Democrats | 408 | $\pm 6$ percentage points |
| Republicans | 285 | $\pm 7$ percentage points |
| Independents | 402 | $\pm 6$ percentage points |
| Opinion of Public Health Insurance Option |  |  |
| Favor public option | 739 | $\pm 4$ percentage points |
| Oppose public option | 393 | $\pm 6$ percentage points |

Filling the need for trusted information on national health issues,

[^0]:    1 May 2010 through December 2011 trend wording was "As you may know, a health reform bill was signed into law early last year..."
    2 April 2010 trend wording was "[President Obama did sign a health reform bill into law last month...] Given what you know about the new health reform law, do you have a generally (favorable) or generally (unfavorable) opinion of it? (Is that a very favorable/unfavorable or somewhat favorable/unfavorable opinion?)"

[^1]:    3 Don't know and Refused were recorded separately for this question and some other questions throughout the survey. Prior to 2016, Don't know/Refused was combined into one category. Trend results prior to 2016 for "Refused" are shown in the "Don't know" category.

[^2]:    ${ }^{4} 2015$ question wording was "I'm going to read you some different things the President and Congress might do when it comes to health care. As I read each one, tell me if you think that should be a top priority, important but not a top priority, not too important or should it not be done?"
    ${ }^{5}$ Trend wording for this item was "Repealing the requirement that employers with 100 or more workers pay a fine if they don't offer health insurance".
    6 Trend wording for this item was "Protecting people from being charged high prices when they visit hospitals covered by their health plan but are seen by a doctor not covered by their plan".

[^3]:    7 Trend wording for this item was "Making sure health plans have sufficient provider networks".
    8 Trend wording for this item was "Eliminating a tax on the most expensive employer-sponsored health plans, also called Cadillac plans, that helps pay for the health care law".

[^4]:    ${ }^{9}$ April 2013 trend based on total sample.

[^5]:    ${ }^{10}$ August 2013 trend based on total sample.

[^6]:    ${ }^{11}$ Trend wording for this item was "The U.S. and Russia brokered cease-fire to the conflict in Aleppo, Syria".

[^7]:    ${ }^{12}$ Refusals were coded by observation.
