Wyoming					Y	134%

SOURCE: Based on a national survey conducted by KFF with the Georgetown University Center for Children and Families, 2019. Table presents rules in effect as of January 1, 2019.

## Table 14 Notes

1. N/A (M-CHIP) responses indicate that the state does not provide a separate CHIP program for uninsured children.
2. In a number of states, the income at which premiums or cost sharing begins may vary by the child's age since Medicaid and CHIP eligibility levels vary by age and some states exempt younger children from cost sharing. The reported income eligibility limits at which premiums and cost sharing begin do not reflect the five percentage points of the federal poverty level (FPL) disregard that applies to eligibility determinations, although this disregard may apply when the income level at which premiums or cost sharing applies aligns with the eligibility cutoff between Medicaid and separate CHIP programs.
3. Florida charges premiums to children enrolled in its three separate CHIP programs, but it only charges cost sharing for children in one of its three separate CHIP programs, Healthy Kids.
4. Georgia does not charge premiums to children under age 6.
5. Kentucky and New Mexico eliminated copayments for children effective January 1, 2019.
6. Tennessee has waiver authority to charge cost sharing for children between 100% and 133% FPL.
