***Survey of Public Attitudes and Knowledge about
HIV/AIDS in Georgia***

November 2015

The *Survey of Public Attitudes and Knowledge about HIV/AIDS in Georgia* was conducted by the Kaiser Family Foundation (KFF) as part of a public information partnership with the Georgia Department of Public Health. KFF researchers designed and analyzed the survey. Social Science Research Solutions (SSRS), an independent research company, collaborated with KFF researchers on sample design, weighting, and fieldwork. Both the Kaiser Family Foundation and the Georgia Department of Public Health contributed financing for the survey.

The telephone survey was conducted in English from July 28 – August 9, 2015, among a random digit dial telephone sample of 556 adults ages 18 and older who currently live in the state of Georgia, and included an oversample of Black respondents to ensure enough interviews to be able to report results separately for this population.

The sample employed an overlapping dual-frame (landline and cell phone) design. In total, 239 computer-assisted interviews were completed via landline and 317 via cell phone, of which 189 were with respondents whose household could be reached only by dialing cell phones. Both the random digit dial landline and cell phone samples were provided by Marketing Systems Group. To oversample Blacks, the landline and cell phone samples were geographically stratified by estimated incidence of Blacks, and areas with higher expected incidence were disproportionately sampled. Interviews were also completed with a callback sample of respondents who had previously completed an interview on the SSRS Omnibus Survey and indicated that they were Black and they resided in Georgia.

All data were weighted adjust for the sampling design (including the Black oversample) and to balance the sample demographics to match estimates for Georgia residents based on data from the U.S. Census Bureau’s August 2013 American Community Survey (ACS). Parameters used included age, education, race/ethnicity, marital status, phone status, rural area residency, and residence in Atlanta. The sample was also weighted to match current patterns of telephone use using estimates from the National Health Interview Survey (NHIS).

The margin of sampling error (MOSE) including the design effect is plus or minus 6 percentage points for results based on the total sample. All statistical tests of significance account for the effect of weighting. Unweighted Ns and MOSE for key subgroups are show in the table below. For other subgroups the margin of sampling error may be higher. Sample sizes and margin of sampling errors for other subgroups are available by request. Note that sampling error is only one of many potential sources of error in this or any other public opinion poll. Kaiser Family Foundation public opinion and survey research is a charter member of the [Transparency Initiative](#) of the American Association for Public Opinion Research.

Group	N (unweighted)	Margin of Sampling Error
Total	556	± 6 percentage points
Non-Hispanic White respondents	250	± 8 percentage points
Non-Hispanic Black respondents	245	± 8 percentage points

Please note:

- Values less than 0.5% are indicated by an asterisk (*).
- Due to rounding, percentages may not always add up to 100 percent.

1. Thinking about HIV and AIDS, how much would you say you know about this issue? A lot, some, only a little, or nothing at all?

	A lot	Some	Only a little	Nothing at all	Don't know	Refused
Total	40	37	20	4	*	*
White	38	39	19	3	-	*
Black	44	37	15	4	*	-

2. How serious of a problem, if at all, are HIV and AIDS in GEORGIA today? Is it very serious, somewhat serious, not too serious, or not at all serious?

	Very serious	Somewhat serious	Not too serious	Not at all serious	Don't know	Refused
Total	38	36	10	3	13	-

QUESTION 14 MOVED TO AFTER 31

15. Antiretroviral drugs, sometimes called ARV or ART, are medications to treat HIV. As far as you know, if someone who has HIV is taking consistent antiretroviral treatment, does this significantly reduce the risk of passing HIV to others, or not, or don't you know enough to say?

		Yes, significantly reduces risk of passing HIV on	No, does not significantly reduce risk	Don't know enough to say	Refused
Total		12	21	67	1
White		10	20	70	*
Black		14	17	68	1

16. As far as you know, is there a prescription medication that people who do not have HIV can take to lower their risk of getting HIV, or not, or don't you know enough to say?

		Yes	No	Don't know enough to say	Refused
Total		6	30	63	*
White		5	33	61	*
Black		7	26	67	*

17. As far as you know, is there medication that a pregnant woman who has HIV can take to reduce the risk of her baby being born infected, or not, or don't you know enough to say?

	Yes	No	Don't know enough to say	Refused
Total	27	10	63	*
White	22	8	70	-
Black	36	11	53	-

18. As far as you know, is there a cure for HIV and/or AIDS, or don't you know enough to say?

	Yes	No	Don't know enough to say	Refused
Total	10	67	24	*
White	9	72	19	-
Black	14	54	32	-

19. Thinking again about antiretroviral drugs sometimes called ARV or ART that are medications to treat HIV. How effective do you think the current treatment options are in terms of (INSERT, RANDOMIZE)? Are they very effective, somewhat effective, not too effective, not at all effective, or don't you know enough to say?

		Very effective	Somewhat effective	Not too effective	Not at all effective	Don't know enough to say	Refused
a. Helping people with HIV live longer	Total	33	31	2	3	29	1
	White	31	34	2	2	30	1
	Black	38	27	2	4	27	1
b. Improving the health of people with HIV	Total	25	31	2	4	38	*
	White	24	31	1	3	41	*
	Black	26	31	3	3	36	*
c. Preventing the spread of HIV to sexual partners	Total	8	15	8	16	53	*
	White	5	14	9	15	56	1
	Black	13	15	4	15	53	*

20. As far as you know, when someone is diagnosed with HIV, when is it recommended that they begin antiretroviral treatment?

	As soon as they are diagnosed	When their CD4 count or white blood cells fall below a certain level	When they begin to feel sick	Don't know enough to say	Other	Refused
Total	49	7	1	41	2	*
White	43	7	*	48	2	*
Black	58	5	2	33	2	-

21. Do you think that most people in Georgia with HIV are able to get the medications they need to treat the disease, or do you think that most of them do NOT get the medications they need?

	Most get medications	Most do not get medications	Don't know	Refused
Total	26	51	22	1
White	27	47	25	1
Black	23	58	18	-

22. Now, turning to your own sources of information about HIV and AIDS. Thinking about everything you know about HIV and AIDS, how much of this information comes from things you've seen or heard from (INSERT, RANDOMIZE items a-f, g always last, b always follows a) – a lot, some, only a little, or nothing at all?

		A lot	Some	Only a little	Nothing at all	Not affiliated with church / religious organization	Don't know	Refused
a.	The internet							
	Total	28	24	20	26	-	2	*
	White	22	23	20	32	-	3	*
	Black	35	22	22	19	-	2	*
b.	Other media, such as radio, television, and newspapers							
	Total	30	28	23	18	-	-	1
