KFF COVID-19 Vaccine Monitor

April 2022

METHODOLOGY

This *KFF COVID-19 Vaccine Monitor* was designed and analyzed by public opinion researchers at the Kaiser Family Foundation (KFF). The survey was conducted April 13-26, 2022, among a nationally representative random digit dial telephone sample of 1,889 adults ages 18 and older (including interviews with 501 Hispanic adults and 500 non-Hispanic Black adults), living in the United States, including Alaska and Hawaii (note: persons without a telephone could not be included in the random selection process). Phone numbers used for this study were randomly generated from cell phone and landline sampling frames, with an overlapping frame design, and disproportionate stratification aimed at reaching Hispanic and non-Hispanic Black respondents as well as those living in areas with high rates of COVID-19 vaccine hesitancy. Stratification was based on incidence of the race/ethnicity subgroups and vaccine hesitancy within each frame. High hesitancy was defined as living in the top 25% of counties as far as the share of the population not intending to get vaccinated based on the U.S. Census Bureau's Household Pulse Survey. The sample also included 115 respondents reached by calling back respondents that had previously completed an interview on the KFF Tracking poll at least nine months ago. Another 286 interviews were completed with respondents who had previously completed an interview on the SSRS Omnibus poll (and other RDD polls) and identified as Hispanic ($n=122$; including 51 in Spanish) or non-Hispanic Black ($n=164$). Computer-assisted telephone interviews conducted by landline (212) and cell phone (1,677; including 1,272 who had no landline telephone) were carried out in English and Spanish by SSRS of Glen Mills, PA. To efficiently obtain a sample of lower-income and non-White respondents, the sample also included an oversample of prepaid (pay-as-you-go) telephone numbers (25% of the cell phone sample consisted of prepaid numbers). Both the random digit dial landline and cell phone samples were provided by Marketing Systems Group (MSG). For the landline sample, respondents were selected by asking for the youngest adult male or female currently at home based on a random rotation. If no one of that gender was available, interviewers asked to speak with the youngest adult of the opposite gender. For the cell phone sample, interviews were conducted with the adult who answered the phone. KFF paid for all costs associated with the survey.

The combined landline and cell phone sample was weighted to balance the sample demographics to match estimates for the national population using data from the March 2021 U.S. Current Population Survey (CPS) on sex, age, education, race, Hispanic origin, region, and marital status, within race-groups, along with data from the 2010 Census on population density. The sample was also weighted to match current patterns of telephone use using data from the January-June 2021 National Health Interview Survey. The sample is also weighted to account for the possibility of partisan nonresponse based on three months of KFF national polls and this current survey. The weight takes into account the fact that respondents with both a landline and cell phone have a higher probability of selection in the combined sample and also adjusts for the household size for the landline sample, and design modifications, namely, the oversampling of potentially undocumented respondents and of prepaid cell phone numbers, as well as the likelihood of non-response for the recontacted sample. All statistical tests of significance account for the effect of weighting.

The margin of sampling error including the design effect for the full sample is plus or minus 3 percentage points. Numbers of respondents and margins of sampling error for key subgroups are shown in the table below. For results based on other subgroups, the margin of sampling error may be higher. Sample sizes and margins of sampling error for other subgroups are available by request. Sampling error is only one of many potential sources of error and there may be other unmeasured error in this or any other public opinion poll. Kaiser Family Foundation public opinion and survey research is a charter member of the [Transparency Initiative of the American Association for Public Opinion Research](#).

This work was supported in part by grants from the Chan Zuckerberg Initiative DAF (an advised fund of Silicon Valley Community Foundation), the Ford Foundation, and the Molina Family Foundation. We value our funders. KFF maintains full editorial control over all of its policy analysis, polling, and journalism activities.

Group	N (unweighted)	M.O.S.E.
Total	1,889	± 3 percentage points
COVID-19 vaccination status		
Have gotten at least one dose of the COVID-19 vaccine	1,449	± 4 percentage points
Have not gotten the COVID-19 vaccine	429	± 7 percentage points
Race/Ethnicity		
White, non-Hispanic	754	± 5 percentage points
Black, non-Hispanic	500	± 6 percentage points
Hispanic	501	± 5 percentage points
Parents		
Total parents	477	± 7 percentage points
Parent with a child under age 5	181	± 11 percentage points
Parents with a child ages 5-11	227	± 10 percentage points
Parents with a child ages 12-17	230	± 9 percentage points
Party identification		
Democrats	650	± 6 percentage points
Republicans	349	± 7 percentage points
Independents	577	± 6 percentage points

Notes for reading the topline:

- Percentages may not always add up to 100 percent due to rounding.
- Values less than 0.5 percent are indicated by an asterisk (*).
- “Vol.” indicates a response was volunteered by the respondent, not offered as an explicit choice
- Questions are presented in the order asked; question numbers may not be sequential.

All trends shown in this document come from KFF Health Tracking Polls or KFF COVID-19 Vaccine Monitors.

AGE. What is your age?
 AGE2. (ASK IF DON'T KNOW OR REFUSED AGE) Could you please tell me if you are between the ages of... (READ LIST)

	n=977

READ TO ALL: Now we would like to ask you some questions about the COVID-19 pandemic.

Q1. Among people you know, have you seen (more) COVID-19 cases over the past 30 days, (fewer) cases, or about the same number as before? (rotate items in parentheses)

	4/22
More cases	6
Fewer cases	62
About the same number of cases	21
Don't know anyone who has gotten COVID-19 (Vol.)	7
Don't know/Refused	4

Q2. Among people you know, would you say that people who have recently been infected with COVID-19 in the past 30 days are experiencing (more severe), (less severe), or about similar symptoms compared to people infected in previous waves? (rotate items in parentheses)

	4/22
More severe	2
Less severe	51
Similar to previous waves	17
Don't know anyone who has gotten COVID-19 (Vol.)	20
Don't know/Refused	10

Q3. Would you say there is a new wave of COVID-19 infections hitting the U.S. now, or not?

	4/22
Yes, there is a new wave	35
No, there is not a new wave	50
Don't know/Refused	14

Q4. How well protected, if at all, do you feel from getting seriously ill with COVID-19? Do you feel...

	4/22
Very/Somewhat well protected (NET)	92
Very well protected	60
Somewhat well protected	32
Not too/Not well protected at all (NET)	6
Not too well protected	3
Not well protected at all	3
Don't know/Refused (NET)	2
Don't know	1
Refused	1

Q5. How prepared do you think [INSERT ITEM] [IF ITEM A, B, C, OR E: “is” / IF ITEM D: “are”] to deal with any future rise in cases due to a new variant of COVID-19? Do you think [IF ITEM A, B, C, OR E: “it is” / IF ITEM D: “you are”] very prepared, somewhat prepared, not too prepared, or not at all prepared? (scramble items a-e)

Item c based on those who are a parent or guardian of a child under 18 in their household

Item e based on those who are employed but not self employed

	Very/ Somewhat prepared (NET)	Very prepared	Somewhat prepared	Not too/Not at all prepared (NET)	Not too prepared	Not at all prepared	Don't know/ Refused (NET)	
a. Your local area 4/22	76	36	40	18	11	8	5	<i>n=1,889</i>
b. The U.S. 4/22	68	25	44	27	15	11	5	<i>n=1,889</i>
c. Your child's school 4/22	75	45	30	17	11	6	8	<i>n=477</i>
d. You and your family 4/22	92	61	31	7	3	3	2	<i>n=1,889</i>
e. Your workplace 4/22	89	66	23	9	4	4	2	<i>n=785</i>

Q6. In the past three months, was there ever a time when you wanted to get tested for COVID-19 but did not get a test because you (INSERT ITEM)? (rotate items a and b)

	Yes, there has been a time in past three months	No, there has not been a time in past three months	Don't know	Refused
a. Were unable to find one available 4/22	9	91	*	*
b. Were not able to afford one 4/22	3	97	*	*

Q7. If you found out you were exposed to COVID-19, how confident are you, if at all, that you would [INSERT ITEM] COVID-19 testing? Are you... [READ LIST]? (rotate items a and b)

	Very/ Somewhat confident (NET)	Very confident	Somewhat confident	Not too/Not at all confident (NET)	Not too confident	Not at all confident	Don't know/ Refused	
a. Be able to get 4/22	94	79	15	5	3	2	1	<i>n=1,889</i>
1/22 ¹	81	51	30	19	11	7	1	<i>n=1,536</i>
