# KFF Health Tracking Poll – April 2019

## METHODOLOGY

This *KFF Health Tracking Poll* was designed and analyzed by public opinion researchers at the Kaiser Family Foundation (KFF). The survey was conducted April 11<sup>th</sup>-16<sup>th</sup> 2019, among a nationally representative random digit dial telephone sample of 1,203 adults ages 18 and older, living in the United States, including Alaska and Hawaii (note: persons without a telephone could not be included in the random selection process). The sample included 290 respondents reached by calling back respondents that had previously completed an interview on the KFF Tracking poll more than nine months ago. Computer-assisted telephone interviews conducted by landline (301) and cell phone (902, including 624 who had no landline telephone) were carried out in English and Spanish by SSRS of Glen Mills, PA. To efficiently obtain a sample of lower-income and non-White respondents, the sample also included an oversample of prepaid (pay-as-you-go) telephone numbers (25% of the cell phone sample consisted of prepaid numbers) as well as a subsample of respondents who had previously completed Spanish language interviews on the SSRS Omnibus poll ( $n=10$ ). Both the random digit dial landline and cell phone samples were provided by Marketing Systems Group (MSG). For the landline sample, respondents were selected by asking for the youngest adult male or female currently at home based on a random rotation. If no one of that gender was available, interviewers asked to speak with the youngest adult of the opposite gender. For the cell phone sample, interviews were conducted with the adult who answered the phone. KFF paid for all costs associated with the survey.

The combined landline and cell phone sample was weighted to balance the sample demographics to match estimates for the national population using data from the Census Bureau's 2017 American Community Survey (ACS) on sex, age, education, race, Hispanic origin, and region along with data from the 2010 Census on population density. The sample was also weighted to match current patterns of telephone use using data from the January-June 2018 National Health Interview Survey. The weight takes into account the fact that respondents with both a landline and cell phone have a higher probability of selection in the combined sample and also adjusts for the household size for the landline sample, and design modifications, namely, the oversampling of prepaid cell phones and likelihood of non-response for the re-contacted sample. All statistical tests of significance account for the effect of weighting.

The margin of sampling error including the design effect for the full sample is plus or minus 3 percentage points. Numbers of respondents and margins of sampling error for key subgroups are shown in the table below. For results based on other subgroups, the margin of sampling error may be higher. Sample sizes and margins of sampling error for other subgroups are available by request. Note that sampling error is only one of many potential sources of error in this or any other public opinion poll. Kaiser Family Foundation public opinion and survey research is a charter member of the [Transparency Initiative of the American Association for Public Opinion Research](#).

Group	N (unweighted)	M.O.S.E.
Total	1,203	±3 percentage points
<b>Party Identification</b>		
Democrats	342	±6 percentage points
Republicans	273	±7 percentage points
Independents	437	±6 percentage points
Democratic-leaning independents	199	±8 percentage points
Republican-leaning independents	181	±8 percentage points

### Notes for reading the topline:

- Percentages may not always add up to 100 percent due to rounding.
- Values less than 0.5 percent are indicated by an asterisk (\*).
- "Vol." indicates a response was volunteered by the respondent, not offered as an explicit choice
- Questions are presented in the order asked; question numbers may not be sequential.

All trends shown in this document come from the Kaiser Health Tracking Polls except:

ACA. As you may know a health reform bill was signed into law in 2010, known commonly as the Affordable Care Act or Obamacare. Given what you know about the health reform law, do you have a generally (favorable) or generally (unfavorable) opinion of it? [GET ANSWER THEN ASK: Is that a very (favorable/unfavorable) or somewhat (favorable/unfavorable) opinion?]

	Very favorable	Somewhat favorable	Somewhat unfavorable	Very unfavorable	Don't know/Refused

11/17	57	27	29	34	14	20	2	7	n=603

Q11. As you may know, some insurance companies are selling a type of insurance plan called a short-term plan that lasts up to 12 months. These plans cost significantly less but provide fewer benefits and do not cover some pre-existing conditions. Do you think the federal government should (allow insurance companies to sell these types of plans) or do you think the federal government should (require plans to provide a certain set of benefits and cover pre-existing conditions)? (rotate 1-2/2-1)

	04/19
The federal government should allow insurance companies to sell these types of plans	26
The federal government should require health insurance plans to cover a certain set of benefits and cover pre-existing conditions	67
It depends (Vol.)	2
Don't know	4
Refused	1

READ TO ALL: As you may know, the 2010 health care law established protections for people with pre-existing conditions that prohibit insurance companies from denying coverage because of a person’s medical history. This may have led to increased insurance costs for some healthy people.

Q3. How important is it to you that the provision that (INSERT) remains law?

Item a: Based on half sample A

Item b: Based on half sample B

		Very/ Somewhat important (NET)	Very important	Somewhat important	Not too/ Not at all important (NET)	Not too important	Not at all important	Don't know/Refused

- Q9. Some Republicans in Congress have proposed plans that would reduce funding to states for Medicaid and reduce financial help for those who buy their own insurance coverage on the ACA marketplace. These plans would give states more flexibility in how to spend the funding and in deciding who to cover and what protections should be in place for consumers. Do you (support) or (oppose) such a proposal? (rotate 1-2/2-1)

PREXa continued...

<sup>16</sup> Results for October 2018 included combined results of questions using current and previous trend wording. Trend reported after October 2018 uses the following question wording: "The term pre-existing condition is used to describe a medical condition that a person had before they got health insurance like a history of asthma, diabetes or high blood pressure, or cancer. Would you say that you or someone else in your household have a pre-existing condition of some sort, or not?"

<sup>17</sup> September 2009 through August 2018 trend wording was "In general, the term 'pre-existing condition' is used by insurance companies to describe an illness or medical condition that a person had before they began looking for insurance. For example, if you were looking to buy health insurance but had a history of asthma, diabetes or high blood pressure, those would be considered pre-existing conditions, along with illnesses such as cancer. Given that definition, would you say that you or someone else in your household would be considered to have a 'pre-existing condition' of some sort, or not?"

	Yes, someone in household has pre-existing condition	No, no one in household has pre-existing condition	Don't know	Refused
