2026 KFF Women's Health Survey

September 2026

KFF

2026 KFF Women's Health Survey

Methodology and Topline

METHODOLOGY

The 2026 KFF Women's Health Survey was designed and analyzed by women's health researchers at KFF. The survey was conducted from March 11 – April 14, 2026, online and by telephone among a nationally representative sample of 5,854 adults ages 18 to 64, including 3,538 women ages 18 to 49. Women include anyone who selected woman as their gender. Sampling, data collection, weighting, tabulation, and IRB approval by the University of Southern Maine's Collaborative Institutional Review Board were managed by SSRS of Glenn Mills, Pennsylvania in collaboration with women's health researchers at KFF.

Throughout the reports of findings, we refer to "women." This includes respondents who said their gender is "woman," and includes those who selected "woman" in addition to another gender, such as "transgender," or "non-binary," or another gender. We followed this approach to try to include as many people as possible but recognize that some people who need and seek abortion and other reproductive health care services may not be represented in the findings or identify as women. Some questions about sexual and reproductive health were only asked among those with a specific sex assigned at birth (i.e. male or female).

The national sample was drawn from two nationally representative probability-based panels: the SSRS Opinion Panel and the Ipsos Knowledge-Panel. The SSRS Opinion Panel is a nationally representative probability-based panel where panel members are recruited randomly in one of two ways: (a) Through invitations mailed to respondents randomly sampled from an Address-Based Sample (ABS) provided by Marketing Systems Groups (MSG) through the U.S. Postal Service's Computerized Delivery Sequence (CDS); (b) from a dual-frame random digit dial (RDD) sample provided by MSG. For the online panel component, invitations were sent to panel members by email followed by up to five reminder emails. 5,660 panel members completed the survey online and panel members who do not use the internet were reached by phone (n=194). Another 514 respondents were reached online through the Ipsos Knowledge Panel to help reach adequate sample sizes among subgroups of interest, specifically women ages 18 to 49. This panel is recruited using ABS, based on a stratified sample from the CDS. The questionnaire was translated into Spanish, so respondents were able to complete the survey in English or Spanish.

The national sample was weighted by splitting the sample into three groups: [1] Women 18-49, [2] Women 50-64, and [3] Men 18-64 and each group was separately weighted to match known population parameters (see table below for weighting variables and sources). Weights within the three groups were then trimmed at the 4th and 96th percentiles, to ensure that individual respondents do not have too much influence on survey-derived estimates. After the weights were trimmed, the samples were combined, and the weights adjusted, so that the groups were represented in their proper proportions for a final combined, gender by age-adjusted weight.

Dimensions	Source
Age	Current Population Survey 2025
Education	
Age by Education	
Age by Gender	
Census Region	
Race/Ethnicity by Nativity	
Home Tenure	
Civic Engagement	2023 CPS Volunteering and Civic Life Supplement
Internet Frequency	Pew Research Center's National Public Opinion Reference Survey (NPORS 2025)
Population Density	Claritas Pop-Facts Premier 2026
Voter Registration	CPS 2024 Voting and Registration Supplement

The margins of sampling error for the national sample of women ages 18 to 64 and reproductive age women ages 18 to 49 are plus or minus 2 percentage points. Numbers of respondents and margins of sampling error for key subgroups are shown in the table below. For results based on other subgroups, the margin of sampling error may be higher. Sampling error is only one of many potential sources of error and there may be other unmeasured error in this survey.

Group	N (unweighted)	M.O.S.E.
National Women Ages 18-64	4,688	± 2 percentage points
White, non-Hispanic	2,262	± 2 percentage points
Black, non-Hispanic	767	± 4 percentage points
Hispanic	1,135	± 4 percentage points
Asian or Pacific Islander	347	± 6 percentage points
18-25	508	± 5 percentage points
26-35	1,313	± 3 percentage points
36-49	1,715	± 3 percentage points
50-64	1,152	± 3 percentage points
<200% FPL	1,641	± 3 percentage points
200%+ FPL	2,707	± 2 percentage points
200%-399% FPL	1,232	± 3 percentage points
400%+ FPL	1,475	± 3 percentage points
Private	2,876	± 2 percentage points
Employer-Sponsored	2,490	± 2 percentage points
Individually Purchased	386	± 6 percentage points
Medicaid	977	± 4 percentage points
Uninsured	537	± 5 percentage points
Democrat/Democrat leaning	2,267	± 3 percentage points
Independent	628	± 5 percentage points

Group	N (unweighted)	M.O.S.E.
Republican/Republican leaning	1,354	± 3 percentage points
National Women Ages 18-49	3,538	± 2 percentage points
White, non-Hispanic	1,536	± 3 percentage points
Black, non-Hispanic	620	± 5 percentage points
Hispanic	944	± 4 percentage points
Asian or Pacific Islander	304	± 6 percentage points
<200% FPL	1,300	± 3 percentage points
200%+ FPL	1,949	± 3 percentage points
Private	2,117	± 3 percentage points
Medicaid	785	± 4 percentage points
Uninsured	456	± 6 percentage points
Democrat/Democrat leaning	1,752	± 3 percentage points
Independent	496	± 5 percentage points
Republican/Republican leaning	896	± 4 percentage points

General Notes:

- Percentages may not add to 100%, or to subtotals indicated, due to rounding.
- The “No answer” category includes refusals and those who volunteered “don’t know” responses.
- The “Not sure” or “Don’t know” categories are only shown in tables when it was an explicit response option (i.e., shown on web or read via telephone) for survey respondents.
- A category with ‘(VOL.)’ signifies a response option was not shown or read via telephone for survey respondents.
- Insufficient sample size for analysis is denoted with “n/a” (e.g., FER4a). The sample size itself is shown, but the percentages are not.
- Some survey questions were asked of males and females based on sex assigned at birth, which is shown in the base text above each question. However, the topline tables show results based on current gender identity.
- Income is based on 2023 ASPE income levels. Two hundred percent (200%) of the federal poverty level (FPL) in 2023 for an individual was \$29,160.
- The sample primarily includes English-speaking Asian adults and, therefore, may not be representative of the overall Asian adult population. Despite this limitation, it is important to report the views of Asian adults on the topics in this study. As always, Asian adults’ responses are incorporated into the general population figures throughout this report.

AGE. What is your age?

AGE2. PHONE: Could you please tell me if you are (READ LIST)?

WEB: Are you:

Combined AGE and AGE2 variable

	Women 18-64 (n=4,688)	Men 18-64 (n=1,148)	Women 18-49 (n=3,538)	Women 50-64 (n=1,150)
NET 18-49	70	70	100	0

SECTION X: SOURCES OF INFORMATION

The next few questions ask about where you get your health information.

INFO1.

In the past year, have you looked for health information or advice from:

- a. Social media platforms such as TikTok, Facebook, Instagram, YouTube, or Reddit

	Women 18-64 (n=4,688)	Men 18-64 (n=1,148)	Women 18-49 (n=3,538)	Women 50-64 (n=1,150)
Yes	39	32	44	27
No	61	68	56	73
No answer	<1	0	<1	<1

- b. An internet search engines such as Google or Bing

	Women 18-64 (n=4,688)	Men 18-64 (n=1,148)	Women 18-49 (n=3,538)	Women 50-64 (n=1,150)
Yes	82	77	83	78
No	18	23	17	22
No answer	<1	<1	<1	0

- c. An artificial intelligence (AI) tool or chatbot such as ChatGPT, Google Gemini, or Claude

	Women 18-64 (n=4,688)	Men 18-64 (n=1,148)	Women 18-49 (n=3,538)	Women 50-64 (n=1,150)
Yes	39	41	42	32
No	61	59	58	67
No answer	<1	0	<1	<1

Summary Table of INFO1: ‘Yes’ total

	Women 18-64 (n=4,688)	Men 18-64 (n=1,148)	Women 18-49 (n=3,538)	Women 50-64 (n=1,150)
An internet search engine such as Google or Bing	82	77	83	78
An artificial intelligence (AI) tool or chatbot	39	41	42	32
Social media platforms	39	32	44	27

(Asked of those who sought health information from social media, search engines, or an AI tool or chatbot)

INFO2.

You said you sought information about health issues from [INSERT: *social media, search engines, or an AI tool or chatbot*]. Did you seek information on any of the following issues?

(Asked of those who are female at birth)

a. Contraception

	Women 18-64 (n=4,011)	Women 18-49 (n=3,076)	Women 50-64 (n=935)
Yes	16	21	3
No	84	79	97
No answer	<1	<1	<1

(Asked of those who are male at birth)

b. Vasectomies

	Men 18-64 (n=950)
Yes	9
No	91
No answer	0

c. Abortion

	Women 18-64 (n=4,029)	Men 18-64 (n=959)	Women 18-49 (n=3,094)	Women 50-64 (n=935)
Yes	8	6	11	2
No	92	94	89	98
No answer	<1	<1	<1	<1

d. Pregnancy and childbirth

	Women 18-64 (n=4,029)	Men 18-64 (n=959)	Women 18-49 (n=3,094)	Women 50-64 (n=935)
Yes	27	13	35	7
No	73	87	65	93
No answer	<1	<1	<1	<1

(Asked of those who are female at birth)

e. Menopause

	Women 18-64 (n=4,011)	Women 18-49 (n=3,076)	Women 50-64 (n=935)
Yes	37	30	56
No	63	70	44
No answer	<1	<1	<1

(Asked of those who are male at birth)

f. Testosterone levels

	Men 18-64 (n=950)
Yes	32
No	67
No answer	<1

(Asked of those who are male at birth)

g. Erectile dysfunction

	Men 18-64 (n=950)
Yes	21
No	79
No answer	<1

h. Mental health

	Women 18-64 (n=4,029)	Men 18-64 (n=959)	Women 18-49 (n=3,094)	Women 50-64 (n=935)
Yes	49	42	54	36
No	51	58	46	64
No answer	<1	<1	<1	0

Summary Table of INFO2: ‘Yes’ total of those who are male at birth

	Men 18-64 (n=950)
Mental health	41
Testosterone levels	32
Erectile dysfunction	21
Pregnancy and childbirth	12

(Asked of those who are female at birth and age 18-49)

CONT1.

Whether you were searching for it or not, in the past 12 months, have you seen or heard anything on social media about contraception?

	Women 18-49 (n=3,519)
Yes	35
No	46
Not sure	19
No answer	<1

(Asked of those who are female at birth, age 18-49, and said they heard something about birth control on social media)

CONT2.

Because of something you saw or heard on social media about contraception in the past 12 months, have you:

- a) Talked to your doctor or healthcare provider about what you saw or heard

	Women 18-49 (n=1,257)
Yes	19
No	81
No answer	<1

- b) Stopped using your hormonal birth control method (e.g., birth control pill, IUD, patch, vaginal ring)

	Women 18-49 (n=1,257)
Yes	8
No	91
No answer	<1

c) Started or changed to a new birth control method

	Women 18-49 (n=1,257)
Yes	9
No	91
No answer	<1

d) Sought more information online through an online search, such as Google or another website

	Women 18-49 (n=1,257)
Yes	34
No	66
No answer	<1

e) Sought more information from an artificial intelligence (AI) tool or chatbot such as ChatGPT, Google Gemini, or Claude

	Women 18-49 (n=1,257)
Yes	14
No	86
No answer	0

Summary Table of CONT2: ‘Yes’ total

	Women 18-49 (n=1,257)
Talked to your doctor or healthcare provider about what you saw or heard	19
Stopped using your hormonal birth control method	8
Started or changed to a new birth control method	9
Sought more information online through an online search, such as Google or another website	34

(Asked of those who are female at birth and age 18-49)

INFO4.

Next are some statements some people have made on social media or elsewhere. Have you heard anyone say or have you read anywhere that:

- a. Hormones in contraceptives are harmful to your health

	Women 18-49 (n=3,519)
Yes	53
No	47
No answer	<1

- b. Hormones in contraceptives limit your ability to get pregnant in the future

	Women 18-49 (n=3,519)
Yes	43
No	57
No answer	<1

- c. Natural family planning methods are as effective as hormonal contraceptives at preventing pregnancy

	Women 18-49 (n=3,519)
Yes	32
No	68
No answer	<1

- d. Emergency contraceptive pills, such as Plan B, cause abortions

	Women 18-49 (n=3,519)
Yes	32
No	68
No answer	<1

Summary Table of INFO4: 'Yes' total

	Women 18-49 (n=3,519)
Hormones in contraceptives are harmful to your health	53
Hormones in contraceptives limit your ability to get pregnant in the future	43
Natural family planning methods are as effective as hormonal contraceptives at preventing pregnancy	32
Emergency contraceptive pills, such as Plan B, cause abortions	32

SECTION 8: DEMOGRAPHICS

HH1.

How many adults age 18 and over currently live in your household including you?

Data available upon request.

(Asked of those who have more than one adult age 18 and over in household)

HH1a.

Besides yourself, how many of these adults age 18 and over are in the following groups?

If there are zero (0) in either group, please type in zero (0).

1 Roommates or housemates

	Women 18-64 (n=3,752)	Men 18-64 (n=920)	Women 18-49 (n=2,832)	Women 50-64 (n=920)
Zero	83	82	81	85
One	6	8	7	5
Two	3	3	3	2
Three or more	2	1	2	1
No answer	7	6	6	7

2 Family members, including spouses or partners

	Women 18-64 (n=3,752)	Men 18-64 (n=920)	Women 18-49 (n=2,832)	Women 50-64 (n=920)
Zero	5	5	6	3
One	58	57	60	51
Two	21	23	18	29
Three or more	15	14	15	15
No answer	1	1	1	1

HH2.

Do any children under the age of 18 currently live in your household?

	Women 18-64 (n=4,688)	Men 18-64 (n=1,148)	Women 18-49 (n=3,538)	Women 50-64 (n=1,150)
Yes	43	36	54	18
No	56	64	45	82
No answer	<1	0	<1	0

(Asked of those who have children under age 18 living in household)

HH3.

How many children under the age of 18 in the following age groups currently live in your household?

a. 0-5 years:

	Women 18-64 (n=2,097)	Men 18-64 (n=382)	Women 18-49 (n=1,903)	Women 50-64 (n=194)
Zero	51	59	48	75
One	30	24	32	17
Two	13	13	14	2
Three or more	4	3	4	3
No answer	2	1	1	3

b. Six to eleven years

	Women 18-64 (n=2,097)	Men 18-64 (n=382)	Women 18-49 (n=1,903)	Women 50-64 (n=194)
Zero	51	59	49	68
One	33	31	34	21
Two	11	7	13	4
Three or more	3	2	3	6
No answer	1	1	1	1

c. Twelve to seventeen years

	Women 18-64 (n=2,097)	Men 18-64 (n=382)	Women 18-49 (n=1,903)	Women 50-64 (n=194)
Zero	50	50	53	31
One	33	34	31	49
Two	12	15	11	18
Three or more	3	1	3	1
No answer	2	1	2	2

Summary Table: Household Family size

	Women 18-64 (n=4,688)	Men 18-64 (n=1,148)	Women 18-49 (n=3,538)	Women 50-64 (n=1,150)
One	14	17	13	17
Two	28	29	24	38
Three	21	22	19	24
Four	18	18	20	13
Five	10	9	12	5
Six or more	9	6	11	3

INC.

To help us describe the people who took part in our study, it would be helpful to know which category best describes your [personal/family] income last year before taxes. Was your total [personal/family] income in 2025 from all sources, and before taxes...
